the bone. But let me ask you this: To me, to be the kind of reader I am, why would I not love this little round make everything more dangerous? "They found this morning of the Wash-N-Dry." "The mechanical?" Margaret asked. I slipped at right for my mother and be in front. "How many people do you know who is named after two killers in their nie and a crime weapon?" The sound? "He has suggested John Wilkes Booth as one of the options." "There is a great difference between a political killer and a killer in San Rio." "I know," I said, looking at her. It was no longer a person, it was just a body. "Run the head." I kept my gloves in the pimp and turned to look at the wall as Margaret lifted the sheet to wash the upper thighs. I froze, thinking it was my mother, but the woman looked at me and walked to a balk. "Oláó John," she said, collecting some rags. "Are you going to be, or are you going to help me?" "Sorry." "I wrapped my sleeves anxiously and went back to the sink." Hostly, "she continued." "I don't even know what they do there in the writing of the coroner. It was not my mother, it was her sister Margaret, they were as much, and when the guys were masked could barely say the difference. He smelled the rotten meat and insect spray, and the fan ventilation fan that fell high on his head was not doing a lot to help. "You have you have coincident ligaments with two killers in SÁ © rie," he said. Every day, his "monster" threatens to escape, identify with this new lever killer, sorry, no killer ... city of Hitler-in-the-seral. It was like playing with a giant doll, wearing her and banking her and opening her to see what was inside. It was very dear. "You shouldn't come with you," she said. "In fact, I was coming with you." "You should also do said Margaret, and I could say Her eyes she was smiling slightly. Mrs. George Washington? She pushed a botan and the bomb pushed sleepy for life, syncopated like a real cardan beaten, and she watched carefully as she moved the buttons that controlled the press and speed. Well, I like more empathy in my boys, but ... you realize what I mean. And because of this, he has a set of rules he rigidly follows. I knew of a feature association that this meant something was bothering her. she asked. I kept my face impassive. I became entangled and thickened with this character in th you are bad, I said. Anderson the last person in Clayton County to die of natural causes for almost six months. And that great positive that made this whole book worthwhile? I was really waiting for you to grow this obsession with killers. "I am not a killer in SA © rie by Dan Wells. Copyright 2009 by Dan Wells. Posted in April 2010 by Tom doherty Associates. She retreated to add more quantic products, The Anderson Cadaver. When I cut my teddy bear in the next week I think she did not do the call. Margaret handed me a cotton pedagment, and I stopped him in the ready while she packed small tufts carefully under the body of the body. It is not unknown to read about a diagnosed sociopath ... Well, at least not for the mother person. I was in the city most of the day, seeing the Polish clean the mess with the Job, and I came back as soon as the sun was starting to go down. And then that part of the middle that ... it was so ... fuck, made me laugh. "Can I do this time?" "Of course," she said, pulling her cheek and the upper body of the body. She died in Silãªncio during sleep in August, Trigamo, according to the coroner, which means she died two days before something tears the interior of Jolley and left him in a laundry. . "He didn't even clean her, he just declared natural causes and sent her. People run, doing their small jobs and creating their small fatigues and shouting their meaningless emotions to the world, and all the time you just watch the side margin, confused. They say it was a peaceful way and worthy of dying, which I suppose that it is technically true, but the long days that someone has led to someone to realize that it does not see it for some time Removed most of the dignity of the situation. And, of course, they all wanted to make friends with the strange boy. The embalming is a long period, with a lot of very accurate work, and you need a clean list To start. "That stinks a lot," I said. "Is it over there. "She stinks very badly." I said. He is a killer. Margaret chose her careful products carefully, as if choosing ingredients for a soup. Margaret sprinkled the brazy with disinfectant and began the wiping - it gently with a cloth. Even when the coroner does his job and cleans his body, we always wash our ves before we start. For her own mother. Margaret's voice was a little clearer, por, a little more. "Poor woman. Energetic. It's not as if they are busy - we can barely be in the business here. " "Jeb Jolley died," I said, drying my moms. of Mother and Capillary. John was my favorite character type at the moment. What happened? " "Murdered," I said, and pulled a mother and an apron of a on the wall. "They thought maybe it was a wild dog, but their guts were in a pile." "That's terrible," said Margaret again. "Well, you're worried about getting out of business." "I said. I fought with the idea that while I'm in love with these types of books, that was really dumb. "I have to guess, or are you gonna tell me which one of your psychopaths you wrote?" "They're not my psychopaths." John. "That's very exciting, isn't it?" "Not especially," I said. The anticoagulant was almost out, so Margaret poured a bright blue conditioner on the pump to help prepare the blood vessels for the formaldehyde. I can't wait to see how he fights his black side. And after looking at the book two reviews and reviews, it seems that book two is even darker, more tasty, better. The eyes were beginning to recede, deflating how they lost moisture, and cotton helped to keep the right shape for visualization. You gotta be kidding. So while you're saying all these stupid and boring things, I'm wondering how it would be to cut you and see what you got there." Stellar, written in point, bad mood, and absolutely noisy scenes that make you think more deeply about life in general. ... I really liked this book. "You're weird, man," Max said, eating another slice of his sandwich. "It's all there is to say. Well, well... what a weird part of the fun was this. Yeah, it was totally unbelievable. I have bigger jobs as I grew up, but I couldn't help with really cool things until I was 12. I was lying perfectly on the table under a blue sheet. I fell in love with him. "That's great," she said, not really meaning it. Is that what you want me to say? "Shut up," said Rob. Margaret tossed the rags in the laundry bin and started gathering the real embalming supplies.I'd been helping Mom and Margaret at the mortuary since I was a little boy, back before Dad left. "Death is a sad thing, even when it pays your mortgage. Yeah, it was an odd direction to go. "Do you know what that means?" "It means you're a freak," he said."It means that you're about as important to me as a cardboard box." I said. He's younger than I am. She looked up at the ventilator fan buzzing behind its grate in the ceiling. It's no worse than anything else down there. I really did have an internal struggle on whether or not I liked what was happening in this one. Other leg."I wanted to say something about how everyone who heard about Jeb would go straight to their auto mechanic, but Margaret never appreciated jokes like that.We moved around the body, leg to arm, arm to torso, torso to head, until the whole thing was scrubbed and disinfected. You her argue out. "I took the right arm of the body and pulled it right. Sure. The teeth were long and yellow. Costomic against you. " "My nickname is "Cleaver," I said. I was surprised to find that everything is going to the sewage system, but really - where would you go? Probably is the student who has already finished the rehearsal. I moved to the body and pulled my right leg as Margaret sprayed it. "I hope the engine is not burning at night." Margaret said the same thing before each embalming, like a sacred corner. I washed my moms calmly in the washbasin, asking me how long I had, and touched gently on the body. They didn't always let me do incisions, but if I did it while they were not seeing, I could escape from it. I was enroered and thickened by this character in the early stages of the book, making it a pleasant of the pam. I occupied the artist firmly and slowly cut it through it, be careful to not completely severed. Margaret turned to prepare the bomb. Most people do not realize how many different quantities packs use, but the first thing that takes their eye is not how many, but how many different colors they are. In a way, it is broken. And yet ... it is strange that, in the end, I loved where this was ??? I can't wait to have time to read book two. You heard me well. He thinks he is intended to be a killer in San © rie. Because he had been killed longer than usual, his chest was thus and empty while the Trown part was almost pupura, like a giant hematoma. Even if they are completely boring on the outside, there may be something interesting inside. He was still acting hard, but I could see his bluster starting to fail, he did not know what to say. "The thing about boxes," I said, " ©Á ©ÁªÁcov aid mU .sal-irba To kill a lot of people-probably more than ten, because you are so overreacted-and then they will have me on TV and ask if I saw it coming, and I will say: 'Inferno Yes, that guy was seriously damaged. ""So I think I have to kill him first," I said. Margaret cried the sealing cream on a small plastic stand, like the shell of an orange wedge, and put it inside the mouth To keep everything closed. After the face was solved, we organize the body carefully, straightening the legs and bending the arms in the chest in the classic pose "I'm Dead" "Main figures of American history." "So. Did he really go there? Now I can see why some people didn't like the direction that this novel took, but actually, after my initial shock, I loved it! It took a while, I admit, to overcome the absurdity with which this was presented. I tightly squeezed the strings that Margaret had wrapped around each vein, sealing them. "That sounds good," said Margaret, pushing the bomb to the table. You're me. The queue of embalming liquids looks like the flavors of syrup in a sno-cone support. And yes, it won't be for everyone. I put the metal tube gently on the chest and made a similar cut into the vein, this time inserting a drainage pipe, which connects to a long coil of transparent plastic pipe that serpented in a drain on the ground. We add one more needle to the lower jaw and we thread a thread through the two, then we twist strongly to keep the mouth shut. While she was working on it, I let her head go and I took the scalpel. This leads some sociopaths to feel superior, as if all humanity were simply animals to be hunted or slaughtered: Others feel a warm and jealous rage, desperate to have what they can't.
